Ingredients (nicotine and acid) use for the synthesis of the salt comply with the standards of European Pharmacopoeia.

To solve in propylene glycol, put in to the glycol and heat to 40-50°C. Avoid exposure to air and to temperature higher than 50°C.

When solved in PG, slight discoloration of the solution is possible and normal.

Nicotine salicylate in concentration higher than 100 mg/ml may precipitate, especially in temperature below 10 °C.

Note: upon exposure to air and/or light, the salt may change the colour to yellow or pale pink.

Notice: packed in inert gas atmosphere – argon.

Storage: stored below 25°C in dark place, keep away from oxygen, oxidizing agents or air. If possible store below 0°C to avoid discoloration and oxidation.
