

QUALITY POLICY INTEGRATED MANAGEMENT SYSTEM

As **A-sense sp. z o.o.**, we create innovative and safe products that support the development of many industries and care for the environment. Our priority is to provide the highest quality products that meet customer expectations, regulatory requirements, contributing to building value for our stakeholders while maintaining the highest standards of safety and business ethics.

Our main objectives:

1. Provide reliable products:

A-Sense sp. z o. o. products must always meet technical specifications, regulatory requirements and customer expectations. Our goal is to achieve 100% product compliance with quality requirements.

2. Building customer confidence:

We develop long-term relationships with customers by providing first-class service, flexibility and quick response to market needs. We regularly gather customer feedback to improve and expand our offerings.

3. Continuous improvement:

We implement cutting-edge technologies and innovative solutions in production processes to continuously improve the quality of our products, process efficiency and minimize costs. We are constantly building and improving the Integrated Management System.

4. Minimizing environmental impact:

We take measures to reduce emissions, waste and raw material consumption. Our manufacturing processes are designed in a sustainable manner and in compliance with environmental regulations.

We achieve our goals based on the following principles:

▪ Customer Focus

Every A-Sense product and service is designed with the needs of customers in mind. We ensure full compliance with international standards, norms and regulations for each product. We regularly conduct customer satisfaction surveys and analyze suggestions for improvement. We are committed to building long-term relationships by providing reliable innovative solutions.

▪ Safety and regulatory compliance

We adhere to strict quality and industry standards. We ensure full compliance with international standards, norms and regulations for each of our products. All our processes and products are carefully controlled to ensure their safety for people and the environment. Every employee of A-Sense sp. z o.o. is responsible for compliance with safety-related policies.

▪ Operational efficiency

We use effective technologies to monitor and optimize production processes. We invest in state-of-the-art control laboratories and operational systems to ensure the highest quality of production. We conduct internal and external audits to identify areas for improvement.

▪ Employee commitment and safety

We provide employees with regular training in the areas necessary to carry out safe and top-quality ongoing processes. We promote a culture of openness, cooperation and accountability at every level of the organization. We facilitate knowledge exchange and the sharing of best practices in quality and innovation.

▪ Environmental responsibility and sustainability

We minimize the use of raw materials and use waste recycling processes wherever possible. We are committed to developing environmentally friendly technologies and using natural resources responsibly. We actively support the development of green chemistry technologies and implement substances with reduced environmental impact.

▪ Monitoring and data analysis

We systematically analyze data on quality, performance and customer satisfaction in order to make improvements. We use tools to identify potential problems and eliminate them at an early stage.

The Management Board of A-Sense sp. z o.o. is committed to:

Continuously develop and improve the Integrated Management System. Provide the necessary resources to achieve quality objectives in each area of operations. Regularly review the assumptions and implementation of the Integrated Management System in order to adapt them to changing market needs, regulations and technology. Promote attitudes in line with business ethics, safety and sustainable development.
